

Industry Institute Interaction Cell (IIIC) For Academic Year 2026-2027

The **purpose of the Industry Institute Interaction Cell (IIIC)** is to act as a **bridge between academia and industry** so that education becomes more practical, skill-oriented, and aligned with real-world requirements. It aims to improve the employability of students by providing them with industrial exposure, training, and internships, while also facilitating joint research and innovation in collaboration with industry partners. IIIC serves as a platform for offering consultancy services and solutions to industry problems through faculty expertise, thereby enhancing the professional growth of both students and faculty. By exposing faculty to the latest industry practices, it helps in keeping teaching methodologies updated and relevant.

Additionally, the cell encourages entrepreneurship and fosters a startup culture among students, ensures that the curriculum remains aligned with current industry trends, and creates ample opportunities for placements and career development.

SI No	Name of the Staff Member	Designation	Department
